

Create app for extracting Reddit data

1. Go to the link in the Notebook (<https://old.reddit.com/prefs/apps/>)
2. Create Reddit Account

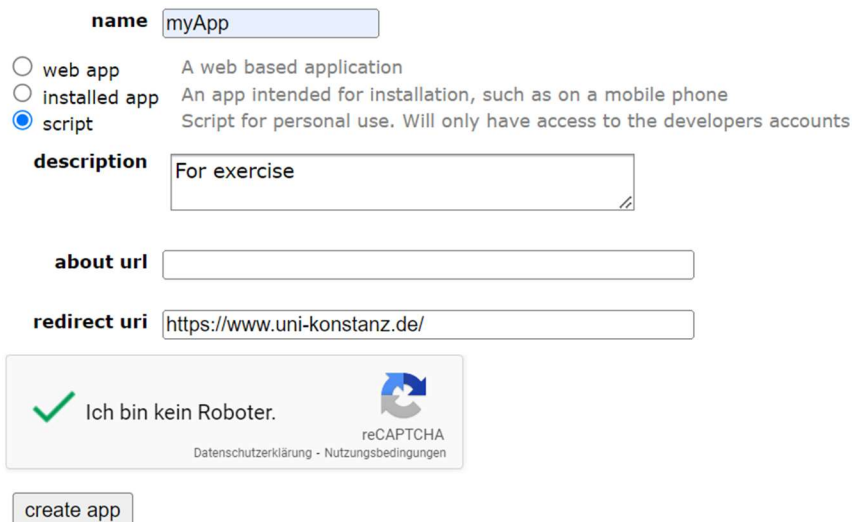

3. Go to Apps

4. Create App (select script, on the URL you can put anything you like)

create application

By creating an app, you agree to [Reddit's Developer Terms](#) and [Data Api Terms](#). You must also [register to use the API](#).

5. Make A NOTE of personal use script and secret tokens (you will need them for creating a reddit instance)

**myApp** For exercise

personal use script
